

Montana UST Tags

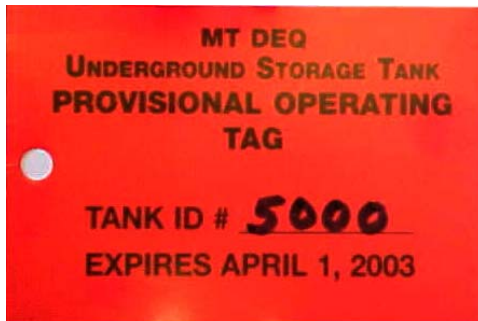

Compliance Tag

This tag has been issued by DEQ for some time to show that a facility is in compliance with 1998 upgrade requirements. It is not an “OK to fill” tag.

Operating Tag

This Operating Tag is new and indicates that the tank system has been inspected, is in operational compliance and may lawfully be filled.

Provisional Operating Tag

This tag is issued when a Compliance Plan has been signed and returned to DEQ. It indicates that the tank system may lawfully be filled until March 1, 2003.

Conditional Operating Tag

This tag is issued to a newly installed tank system to give the operator time to establish their record keeping, have an inspection conducted by a licensed Compliance Inspector and get an Operating Permit and Tags from DEQ. Tank systems with this tag may lawfully be filled.
